Go GREEN with Eastern Tabletop

For over 70 years, Eastern Tabletop has been a trusted supplier of high-quality products to the U.S. hospitality industry, consistently innovating in buffet equipment. Their partnership with EcoBurner introduces eco-friendly solutions to buffet setups, with their products reducing carbon emissions by up to 75% and eliminating the need for water and single-use items.

By offering buffet equipment powered by EcoBurner, Eastern Tabletop is helping hospitality venues embrace sustainable practices and reduce their environmental impact.

■
EcoBurner

We believe gels and wicks have no place in modern hospitality. They can be dangerous for staff to handle and are detrimental to our precious environment.

Stop using Gels & Wicks

So much waste is created by using gels and wicks. They are usually only used once and disposed of after every service. This is unacceptable in today's world of hospitality.

As hotels and catering venues strive to eliminate single use items, these gel and wick pots need to go.

Stop wasting WATER

An average water-based chafers uses approximately 0.264 US Gal of water every hour of use and this water needs to be heated, transported and disposed of which is very wasteful.

EcoBurner equipment uses hotplate technology instead of water pans to disperse the heat so water based chafers are no longer necessary.

What is EcoBurner

A refillable burner that provides portable heat for buffet food.

The EcoBurner is refilled with EcoBurner fuel after service so that every drop of fuel is used or saved for the next service. Each can of EcoBurner fuel gives up to 36 hours of burn time.

It's a SAFER CLEANER & GREENER alternative to single-use gels and wicks.

EcoBurner #EB18999

EcoBurner Fuel #EB19009

Switch to EcoBurner

The call to eliminate gel and wick pots from hospitality settings is getting louder. Hotel managers realise the dangers of having their teams handle these pots of chemicals near food and most have heard stories of terrible injuries resulting from the mishandling of these single-use items.

EcoBurner is different, it's the safer, cleaner and greener option for staff to handle and guests to be around.

SAFER

- Always cool-to-touch.
- Switches off if overturned or over-heats.
- No open chemicals near food.

CLEANER

- No black, smoky residue left on cookware.
- No toxic fumes = pleasant atmosphere for guests.
- No messy fuel spills.

GREENER

- Zero Fuel Waste.
- Zero Waste to Landfill.
- Up to 75% less Carbon than gels or wicks

1 can EcoBurner fuel = 18 gel/wick pots

EcoHold

Powered by EcoBurner

Banqueting cart that caters for either HOT or COLD service

WITH THERMOFLEX TECHNOLOGY

EcoHold32 #9200

Premium Banqueting

The EcoHold is a premium banqueting cart designed to keep food hot or cold, offering unmatched performance for foodservice operations. Built with durable, high-grade steel, it is engineered to withstand the demands of commercial kitchens. This innovative cart is packed with clever features that enhance functionality, streamline foodservice, and ensure optimal food quality, making it a revolutionary addition to any professional catering environment.

Foot Pedal

Doors open using a foot pedal for easy, hands-free access to dishes.

Thermometer

Mechanical built-in thermometer to monitor temperature of cart.

Glass Doors

Both doors feature double-glazed, toughened, and insulated glass, offering a complete view of contents.

Lockable

Doors can be locked for stability during transport and to ensure food integrity.

Handrail

Wrap-around handrail and rubber bump rails on all corners for effortless transport and handling.

EcoHold 32

Standard Capacity

Each EcoHold is designed to accommodate up to 32 GN 1/1 food pans, making it ideal for serving buffets at large-scale events.

Please note that these standard-sized food pans are not included with the EcoHold 32 but can be easily purchased separately.

Weight: 496lbs when empty

External: (WxDxH): 42.1" x 33" x 75.3"

Internal: (WxDxH): 34.2" x 27.4" x 63"

Plated Service

EcoHold 32 Plated Service

Every EcoHold includes 32 perforated pans that can be used for plated service. These pans hold a max of **64 dinner plates** (28cm diameter) or **96 appetiser plates** (20cm diameter).

32 X

Included as standard

Expansion Kit

Available to order to increase plated capacity

An Expansion Kit is available to order separately to increase the capacity of plated service. The pack contains an extra 32 perforated pans and 64 extra rails to fit the pans on.

This doubles the capacity to **128 dinner plates** (28cm diameter) or **192 appetiser plates** (20cm diameter).

EcoHold 32 Expansion Kit #5341

Powered HOT by up to 6 EcoBurners

- No electricity, batteries, or cables required.
- Even heat distribution achieved through controlled venting ensures every dish stays hot for at least five hours.
- Continuous heat during transportation.
- Temperature of the cart can be adjusted by adding EcoBurners to increase heat or removing them to reduce it.
- Safety features remain functional during use.

- No electricity, batteries, or cables required.
- EcoHold comes with 10 reusable Cool Packs for CHILLED service, which are also compatible with EcoServe GN 1/1.
- The frozen Phase Change Material (PCM) used in the cool packs keeps the EcoHold cart cold for at least five hours, ensuring food safety and quality.
- Maintains an even chilled temperature throughout service and transportation.

EcoServe

Powered by EcoBurner

EcoServe offers a range of WATERLESS chafing dishes that cater to every style.

WATERLESS

Stop wasting water, time, energy and cost.

WINDPROOF

Perfect for outdoor dining and no more wrapping chafers in foil to avoid the wind.

QUICK & SAFE

Heats up quickly, easily swap dishes and no electricity or hazardous cables required.

FLEXIBLE

Caters for large or small events. The buffet can be built to your style and requirements.

EcoRock

8QT Rectangle
6QT Square
6QT Round

The EcoServe Classic range combines the timeless appeal of traditional chafing dishes with modern eco-friendly benefits. Offering zero water usage, zero waste generation, and a reduced carbon footprint, it's a sustainable choice without compromising style.

Available in three sizes, the range provides chefs with options to suit any catering setup.

GN

Rectangle
Six Finishes

The EcoServe GN is expertly crafted for commercial kitchens, designed to accommodate standard GN 1/1 sizing. With its minimalist styling and six elegant finishes—White, Black, Brushed Stainless Steel, Polished Stainless Steel, Gold PVD, and Copper PVD—it appeals to a variety of style preferences, making it a versatile choice for any buffet setup.

Round

Large & Small
Six Finishes

The EcoServe Round offers a choice of large and small sizes with varying heights and is available in the same six stunning finishes as the EcoServe GN - White, Black, Brushed Stainless Steel, Polished Stainless Steel, Gold PVD, and Copper PVD. This allows chefs to mix sizes and finishes to craft unique and personalised dining experiences that reflect their individual style.

EcoRock WATERLESS Chafers

Experience the timeless elegance of traditional hinged chafing dishes with the added sustainability of our waterless design. Perfect for venues seeking a classic look while minimising their environmental impact.

EcoPan

Powered by EcoBurner

Each EcoPan **saves 581 US Gal** of water every year if used instead of a waterpan!

Use existing food pan

Drop in NEW EcoPan

Use existing Chafer

Go WATERLESS

using your existing chafers

Simply remove the water pan from existing chafers and replace it with an EcoPan to create a WATERLESS Buffet. This is a cost-effective method of going WATERLESS with minimal spend on new equipment.

EcoPan x 5 #EB15330

INDOORS

Only 1 EcoBurner is needed for indoor buffets.

OUTDOORS

Use 2 EcoBurners outdoors.

WATERLESS 5-star RollTop Chafers

Now you can use Eastern Tabletop chafing dishes with an **EcoPan** to create a WATERLESS chafer, powered by EcoBurner instead of single-use gels or wicks.

The high quality chafing dishes you know and love can now add to your sustainability goals too by reducing carbon and waste and eliminating water completely.

EcoTile

Eastern TableTop offers a collection of collapsible buffets including the **ZOZZ**, **HUB**, and **Q-BIK** mobile units. With an interchangeable tile system, customers have the flexibility to switch out tiles among these three units based on their specific functions and desired locations.

EcoBurner is compatible with three of these tiles that can be used to make these systems more sustainable by eliminating water and carbon and waste.

3 tiles to choose from that are powered by EcoBurner and compatible with all Eastern mobile buffet systems!

Single round warming tile

#EB1804GB

A tile with a single round hotplate allows customers to use one large round dish on any of the three mobile buffet systems. Simply clip an EcoBurner into the clips underneath for a consistent heat that keeps food warm anywhere!

Double round warming tile

#EB11803GB

A tile with two round hotplates allows customers to keep two dishes of food hot at the buffet by simply clipping EcoBurners into the clips underneath for a consistent heat that requires no electricity or cables and can be moved to any location.

GN warming tile

#EB1807GB

The EcServe GN (sold separately) fits into the EcoTile GN and is then used on any of the ZOZZ, HUB or Q-BIK mobile buffets. EcoBurners are then clipped into the EcoServe GN to provide the heat source.

EcoBurner with EcoBoost MINI

Replace single-use gels or wicks for zero waste and less carbon! Simply attach an EcoBoost MINI bracket to the top of an EcoBurner and place it under existing chafing dishes for improved sustainability.

Using only the EcoBurner with an EcoBoost MINI under any existing chafing dish will still **reduce carbon and waste** and make the buffet a safer system.

Stop using gels & wicks on any buffet!

EcoBoost MINI #EB11139

Grill-type chafers

Use 1 EcoBurner on low with an EcoBoost MINI bracket under grill-type chafers. This will give a consistent, radiant heat that's perfect for foods that need more controlled heat such as melted cheese.

Hinged chafers

Use 2 EcoBurners on high with EcoBoost MINI brackets under traditional hinged chafing dishes. These are used instead of gels or wicks to reduce carbon by 75% and eliminate waste completely.

Roll-top Chafers

Use 2 EcoBurners on high with EcoBoost MINI brackets under roll-top chafing dishes. Simply replace the single-use gels or wicks for a safer, cleaner and greener buffet.

Coffee Urns

The Eastern range of coffee urns can now be heated using the EcoBurner with an EcoBoost MINI clipped on to the top for more efficient and consistent heat.

An EcoBoost MINI is required for efficient heating of coffee urns

SAVINGS from 1 Chafing Dish in 1 Day

WATERLESS equipment is more sustainable and reduces operating costs by requiring just one EcoBurner heat source instead of two gels/ wicks.

1 chafer

Twice a day

1 chafer in use for 3-hour service, twice a day = 6 hours per day

WATER

1 water-based chafing dish uses an average of 0.264 US Gal of water every hour. That's 1.58 US Gal of water wasted every day if traditional chafers are used. This is easily prevented by switching to EcoServe WATERLESS chafers.

1.58 Gal

Water saved

WASTE

1 water-based chafing dish uses an average of 4 gels over a 3-hour service, twice a day = **8 gels every day.**

At the end of service, these pots, some still containing toxic chemicals, often go straight to landfill, weighing approximately 1.8oz each.

This is 14.4oz of waste per chafing dish created unnecessarily every day.

8 gel pots

14.4oz waste prevented

CARBON

EcoBurner fuel has been independently tested by Carbon Footprint against industry standard gels and wicks with the following resulting emissions per day (2 x 3-hr services).

	kgCO ₂ e
EcoBurner Fuel:	0.32
DEG:	0.93
Methanol:	0.82
Ethanol:	1.15
Average gel/wick:	0.97

EcoBurner emits 0.32 kgCO₂e of carbon a day if used for 6 hours. This is compared to the average of gels/ wicks emitting 0.97 kgCO₂e. This results in 0.65 kgCO₂e less carbon every day from only 1 chafing dish.

0.65 kgCO₂e

Less Carbon

COST

Cost is based on average price of \$2.08 per gel pot.

8 gels are needed per day so cost of gels is **\$16.64**

\$2.08 multiplied by 8 = \$16.64

Cost is based on average price of \$15.83 per 36-hr EcoBurner fuel can.

6 hours burn time are needed per day so cost of EcoBurner fuel for 6 hours is **\$2.64**

\$15.83 divided by 6 = \$2.64

\$16.64 minus \$ 2.64 = \$14

\$14

Dollars saved

Chef William Pfeiffer

Executive Chef & Beekeeper,
FLIK Hospitality Group

“With a traditional gel or wick, you get one single heat source that wants to heat whatever is directly above it, but with EcoBurner, you get an adjustable radiant heat with no burn spots.”

AT A GLANCE

CHALLENGES OF GELS

- Inconsistent heat
- Not suitable for outdoors
- Hugely wasteful & hard to dispose

BENEFITS OF ECOBURNER

- Consistent, adjustable heat
- Refillable so ZERO WASTE
- More cost-effective
- Saved \$90.18 (59%) on fuel from 1 buffet event!

Matthew Darnall

Director of Food & Beverage, St.
Andrews Country Club,
Boca Raton, Florida

“...the club has saved approximately 3,000 sternos from going into landfills since they started using EcoBurner less than a year ago. That's a really significant prevention of single-use items hitting our landfills.”

Support Products

EcoBurner is the most sustainable method of portable heat for buffets but just like any equipment, it's important staff know how to use it correctly.

The filling station is essential for checking fuel levels, while the Storage Rack, SOP sticker, EZFill, and Storage Trolley work together to help venues establish clear systems. These ensure staff always know how to use, store, and maintain EcoBurners, allowing everyone to continue enjoying the benefits.

Filling Station

A filling station is provided free of charge to all venues using EcoBurners. Staff must use it to measure fuel levels before and after refilling every EcoBurner.

#EB19502

Storage Rack

Use the EcoBurner Storage Rack to securely store up to 8 EcoBurners. Follow the laser-marked instructions for proper storage. Racks are stackable for efficient organization.

#EB15337

SOP Stickers

Free SOP stickers are provided to display near the EcoBurner storage area, giving staff clear instructions on filling, storing, and using EcoBurners.

#EB19962

EZFill

EZFill is a smart solution for effortless EcoBurner refills. Simply place the fuel can upside-down, align it with the EcoBurner, and lightly pull the lever for a smooth refill.

#EB19509

Storage Trolley

The storage trolley holds up to 15 storage racks (120 EcoBurners) and provides an efficient back-of-house space for storing, refilling and organising everything needed for EcoBurners.

#EB15393

Continued Online Support

With frequent staff turnover in hospitality, we provide ongoing training and support for EcoBurner users. Comprehensive online resources ensure safe, continuous use. For any issues, follow our simple 3-step process to resolve them quickly.

Step 1

Watch the Instruction Video
(2:24 mins)

Step 2

Go through TROUBLESHOOTING
if your EcoBurner is not working.

Step 3

Talk to an EcoBurner expert for
further support and training.

Member of
WORLD ALLIANCE
for EFFICIENT SOLUTIONS | by **SOLARIMPULSE**
FOUNDATION

EcoBurner has been awarded the “Solar Impulse Efficient Solution” Label, a proof of high standards in profitability and sustainability.

Solar impulse identified 1000+ clean and profitable solutions to address environmental issues without compromising on economic growth and EcoBurner is one of them! This is thanks to the WATER and CARBON savings achieved by using the EcoBurner system instead of gel and wicks.

To receive the “Solar Impulse Efficient Solution” Label, EcoBurner was thoroughly assessed by a pool of independent experts according to 5 criteria covering the three main topics of Feasibility, Environmental and Profitability. All labelled solutions are part of the #1000solutions portfolio that are presented to decision-makers in business and government by Bertrand Piccard, Chairman of the Solar Impulse Foundation. The aim of this initiative is to encourage the adoption of more ambitious environmental targets and fast-track the implementation of these solutions on a large scale.
