

# ARTISAN

DELICATESSEN & SPECIALTY
COLLECTION

Cayuga understands product merchandising today is about fresh presentation, versatility and innovation. Retailers require that their showcase lineups have the flexibility to maximize their available space, but also enable them to create their own distinctive look. This is where the Artisan Collection comes in: customizable cases designed to connect and form continuous and unique lineups.

The Artisan Collection reflects the latest styles and trends in the industry - helping you keep your look and brand fresh. Designed and manufactured at our own North American facility, the entire collection is fully customizable with a variety of finishes, colours, materials and other options. The modular design allows you to create a seamless line up - from 4 to 400ft.

And when you work with Cayuga Displays, you can always be confident we'll help you to select the right product and options, so that you have the food presentation that is certain to elevate your customers' experience and enhance your brand - beautifully.

"Longos is pleased to support Cayuga Displays."
Your team's quick service/
turnaround for projects has helped us with our millwork for bakery and floral in past projects. More recently your team has come up with some cost effective refrigeration solutions for our bakery and produce."

Paul Collette, Longo's Support Center Project Manager Real Estate and Construction

How to Order	79

## THINGS TO CONSIDER

Showcases are designed to display your refrigerated products at 38-41°F (4-5°C). Showcases are designed to perform in environments of maximum 75°F (23°C) and 55% relative humidity.

#### \*\*NOTE: FOR YOUR SHOWCASE TO FUNCTION AT PEAK EFFICIENCY YOU WILL NEED PROPER CLIMATE CONTROL AND AIR CIRCULATION\*\*

You need to consider the following when selecting a showcase and placing it in your store environment:

### Consider nearby doorways and vestibules

### Consider nearby windows

### Consider nearby vent sources, hoods, cooking equipment and fans

Ensure your display is level and plumb

A location near a doorway will negatively affect the airflow and holding temperature of both open and closed showcases.

Direct sunlight will negatively affect the holding temperature of both open and closed showcases.

HVAC ceiling vents, exhaust hoods, cooking equipment (steam heat) and ceiling fans will negatively affect the airflow of open showcases and will create condensation on the showcases if not properly managed.

Ensure your showcase is plumb and level to allow for proper drainage of condensation water.

Please note: These are critical points to ensure the best results for your equipment and efficient space – and the best return on your investment!

### **Regular Maintenance and Cleaning**

Your showcase will work at its peak performance with regular maintenance. Refer to the Owner's Manual for maintenance and cleaning instructions.

To access the Owner's manual either visit us at cayugadisplays.com/resources/manuals or access the QR code located on the electrical box of your case. You can also check out our online maintenance video.

Watch our maintenance videos at <a href="https://cayugadisplays.com/resources/videos">https://cayugadisplays.com/resources/videos</a>

Leave appropriate space behind display

Clean your condenser grill and pre-filter

ONLY PRE-CHILLED product in case

Noise

Condensation on closed and open cases

A 6" space is required behind any showcase that is against a wall or has a rear obstruction to allow for proper air flow around your showcase.

Use the included brush to regularly wipe away dust. Too much dust will not allow the refrigeration to work properly and could result in **expensive** damage.

\*\*Refer to Owner's Manual for additional case cleaning checklist\*\*

Refrigerated displays are designed to KEEP COLD PRODUCT COLD – they are not designed to bring warm products down to a cold temperature. For food safety it is always imperative that warm product be properly chilled (using a blast chiller or cold room) prior to storing in the refrigerated display case.

Self-contained cases have compressors, motors and fans and these will make noise. Keeping your showcase serviced and clean will help keep the noise level under control, improve lifespan, and maintain efficiency.

Condensation is caused by warm, moist air coming into contact with cool surfaces. If the case environment is not maintained below 75°F/23°C and 55% relative humidity, condensation may occur.

#### TECHNICAL SPECS FOR SELF-CONTAINED REFRIGERATION AVAILABLE UPON REQUEST

#### **STANDARD FEATURES:**

- Remote refrigeration.
- Medium display depth 35 %".
- · Brushed stainless steel interior finish.
- Black or white painted front exterior metal décor pan with a 4" vertical flat panel.
- LED light strips are mounted on the top ledge of the display area and under each shelf level.
- 1-14" and 1-16" adjustable brushed stainless steel with integrated front product stop.
- Top mounted roll-down night curtain
- Square front glass profile

#### **CUSTOM FEATURES:**

EXTERIOR FINISHES	
Formica laminate finish:	
Other laminate finish (specify):	
Brushed Stainless Steel	
Oak Veneer Plywood	
Birch/Maple Veneer Plywood	
- Vertical grain direction	
- Horizontal grain direction	
- Clear Finish	
- Stain Finish	
11 ½"H extended front décor panel	
18"H extended front décor panel	
1" black McCue impact bumper strip applied to the front of the display	
Other McCue impact bumper sizes and colors available	

- Designed to maintain the critical temperature of the products within the display at a range of 38-41°F (3-5°C) with an ambient atmosphere of 75°F (24°C)/55% humidity.
   Designed for holding pre-chilled product only.
- 1-year parts and labor warranty.

END PANELS	
The same interior/exterior laminate	
Brushed stainless steel interior

MODEL	LENGTH
DOUW-4838-MR	48 ¼"
DOUW-6038-MR	60 ¾"
DOUW-7238-MR	72 ½"
DOUW-9638-MR	96 ½"

Length does not include end panels. Add 1" per panel.

#### **FEATURES:**

- Brushed stainless steel internal cabinet construction.
- Many exterior finish options available; powder coat paint, brushed stainless steel, decorative laminates and natural wood finishes.
- Three interior finish options: textured powder coat black, white and brushed stainless steel.
- The front décor panel can be extended to provide a more finished cabinet look.
- Other custom options are offered. Refer to the options schedule on the next page.
- The refrigerated front self-service display has a LED light strip mounted to the top ledge of the display area, and one 12"D adjustable metal shelf with a front product stop and LED light strip mounted to the bottom of the shelf.
- The refrigerated rear storage cabinet is constructed of brushed stainless steel and has rear thermal sliding doors.
- The top preparation area has an integrated front refrigerated well to hold a series of ¼ stainless steel food pans and lids. The prep counter is brushed stainless steel and has a removeable white nylon cutting board.
- The top preparation area is protected by a front mounted tempered glass sneeze guard, top shelf and end panels.
- Designed to maintain the critical temperature of the products within the display, the storage cabinet and the top refrigerated well at a range of 38-41°F (3-5°C) with an ambient atmosphere of 75°F (24°C)/55% humidity.
- The refrigeration system is adjusted by two temperature controllers, one to control the front and top of the display and the other to control the rear storage cabinet.
- ETL electrical certification and NSF-7 standards.
- Self-contained refrigeration available. Contact Cayuga Displays for details.

Note: Information and specifications may change due to engineering improvements.

#### **ADDITIONAL FEATURES:**

- Designed to maintain the critical temperature of the products within the display at a range of 38-41°F (3-5°C) with an ambient atmosphere of 75°F (24°C)/55% humidity. Designed for holding pre chilled product only.
- ETL listed and sanitation certified to NSF 7.
- 1-year parts and labor warranty

### HOW TO CALCULATE LENGTH OF LINE-UP

Available Showcase Section Lengths (Without End Panels)			
Nominal Length (Feet)	Nominal Length (Inches)	Actual Length (Fractional)	Actual Length (Decimal)
3'	38"	38 1⁄4"	38.250"
4'	48"	<b>47</b> 7/8"	47.875"
5'	57"	57 ¾"	57.375"
6'	76"	76 ½"	76.500"
8'	96"	95 %"	95.625"

#### Procedure:

- 1. Take total desired length of line-up in feet and divide by eight.
- 2. Split resulting number into two parts; the whole number and the decimal number.
- 3. The whole number represents the number of eight-foot sections.
- 4. The decimal number needs to be multiplied by eight to determine the nominal length of the final section.

## Example:

1. Desired length is 27ft;

$$27 \div 8 = 3.375$$

- 2. Whole number is 3 and decimal number us 0.375.
- 3. The 3 represents the number if eight-foot sections.
- 4. The decimal number of 0.375 multiplied by eight is used to determine the final section length (in this example it is a three-foot section).

$$0.375 \times 8 = 3$$

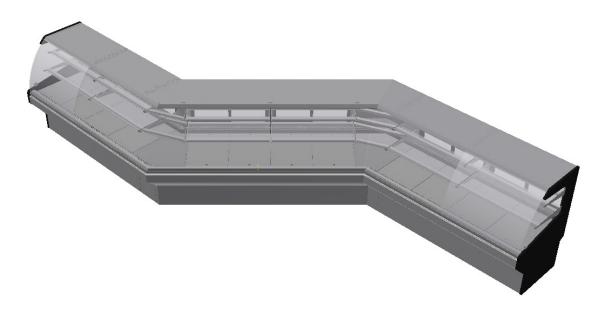

#### II BROKEN DOWN INTO SECTIONS II

In general, most line-ups can be broken down into 8ft sections with a single final section making up the remaining length desired as shown in the figure above. The line-up is then completed with a 1" thick end panel on each end. The chart on the page before can be used to calculate the actual length of the line-up.

#### Note:

This is a guideline, exact configuration and final length will need to be determined by engineering.

### **ACTUAL CASE LENGTH CALCULATION OF LINE-UP**

To determine the actual length of the line-up:

- 1. Take the whole number from the procedure mentioned on the previous page and multiply it by the **actual length** (decimal) of an 8ft section.
- 2. Take the final section length value from the procedure mentioned on the previous page and determine the **actual length (decimal)** of the section.
- 3. Add 2 inches to actual length value to represent an end panel on each end.
- 4. Divide the final value obtained in the above step by 12 to determine the length of the line-up in feet.

## Example:

1. Whole number in the previous example was 3; actual length of three 8ft sections is

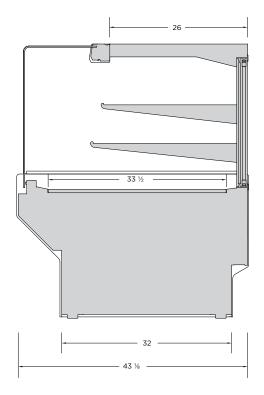

$$3 \times 96.625 = 286.875$$

- 2. Final section length in the previous example was a 3ft section; actual length of final section is 38.25
- 3. 286.875 + 38.25 = 32.125 inches
- 4. 325.125 + 2 = 327.125 inches
- 5.  $327.125 \div 12 = 27.26$  feet.

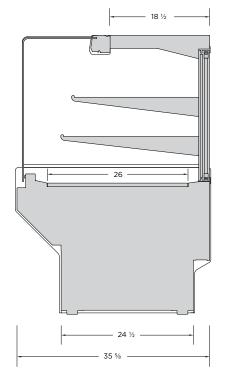

Total actual length of the lineup is 27.26ft (or 27 ft 3 1/8 in)

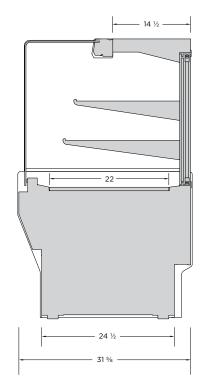

## **CASE DEPTHS**

Large Frame Depth

Medium Frame Depth

Small Frame Depth

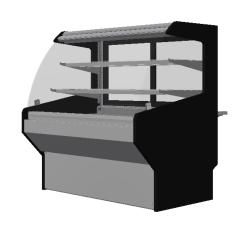

## SHOWCASE CONSTRUCTION

- Concept: sheet metal construction creates a strong, rigid, high-quality showcase that allows for easy customization when required
- Full-length accessible wire way allows for easy wiring & component replacement
- Standardized design of framework allows for wide variety of exterior and interior materials/finishes
- Sled-runner base and adjustable struts make installation and alignment easy
- Easy-to-access areas for electrical, plumbing and refrigeration installation

### LIFT-UP GLASS

Glass Front Closed

#### **Positive**

- Easier to gain access to clean and perform maintenance inside case
- Easier to load product into the front of case
- Easier access to adjust shelves

Glass Front Open

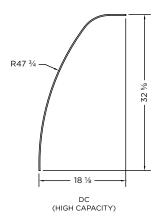

## Negative

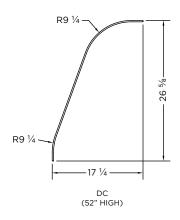

- More expensive
- Safety issues chance of hitting head on glass
- Increase in maintenance of parts

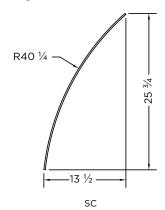

## **GLASS PROFILES**

DC~ Double Curve

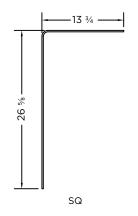

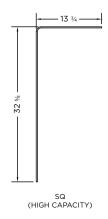

SC~ Single Curve

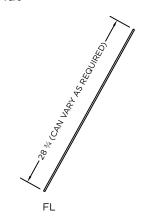

SQ~ Square

FL~ Flat

## SQUARE GLASS DESIGN. WHY OURS IS BETTER

- Concept: single-piece square glass design creates sharp appearance showcase with increased product capacity
- · Single piece design reduces complexity and cost
- Tight bend radius has very little effect on sightlines
- Available in tilt-out or lift-up operation
- Square glass profile allows for ~15% increase in product capacity (vs. other glass setups)
- Vertical front panel of glass allows for product to be displayed up to 6" closer to customer (vs. other glass setups)
- Cost effective
- Less complex = less maintenance
- Less glass alignment issues
- Better presentation of product
- No glass chipping
- Cleaner look
- Less bulky hardware = better visibility
- No sagging/ breaking hardware

## FRONT DECOR PANEL STYLES

Standard 4" Decor Panel

Standard 11 1/2" Decor Panel

Extended Decor Panel

## **EXTERIOR FINISHES**

Laminate

Textured Painted Metal

Vinyl

Wood

Stainless Steel

Wood Panel

## **ADJUSTABILITY OF THE CASES**

Our unique strut system is designed to allow you to slightly adjust the angle at which the front glass, shelves and top

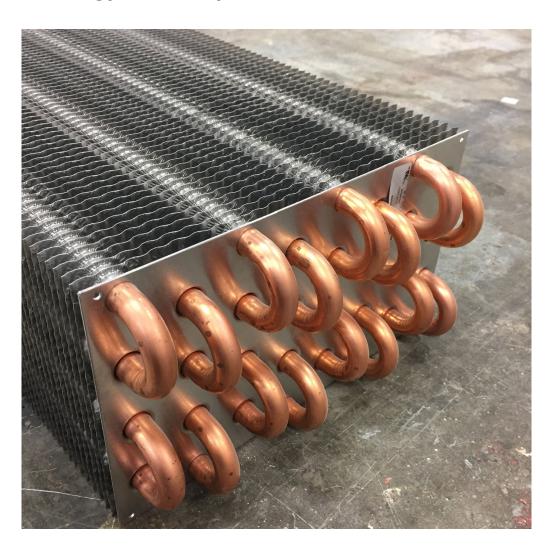

deck (typically metal or glass) sit. Adjusting the two bolts (circled in red in the image above) located at the rear of the unit on either end of a case section will allow the strut system to be tilted forward and down or back and up as indicated by the black arrow. This will allow you

to level and line up your front glass and shelves to help create the look of a seamless case and to better help showcase your product.

## **COLD AND SLOW REFRIGERATION TECHNOLOGY**

- Concept: move more air, more slowly
- Evaporator coils are multi circuit with staggered tubes and ripple fins for improved cooling and efficiency (Heresite dipping available)
- Back of speed-controlled small fans lifts air to let it drop naturally instead of high-speed air rotation
- TEV's allow the showcase to operated efficiently over a range of temperatures for more flexibility
- Gets to temp faster
- More even distribution
- Better energy efficiency

## **SERVICEABILITY**

#### Kelvin (K)

A measure of the colour of a light source. Incandescent lights have a low colour temperature of approximately 2200-3000K and are called warm colours (red-yellowish tone). Warm white LED lamps have a colour temperature between 2000-3000K. Lamps related between 3100-4500K are viewed as white and are called cool colours (bluish-white tone), white lamps above 4600-6000K tend to have blue cast.

Colour Rendering Index (CRI)

• CRI is a scale from 0 to 100 percent indicating how accurate a "given" light source is at rendering colour when compared to a "reference" light source. The higher the CRI, the better the colour rendering ability.

#### Formica® Laminate

Formica Group provides surfaces that fuse beautiful design with purposeful functionality. Formica\* Products provide versatile surfacing solutions that are inspired by and adapt to the way people live, work and play.

Formica® Brand Laminate offers a broader range of looks than ever before. Transform spaces with our modern laminates that are as beautiful as they are durable. Mix and match solids, patterns and finishes.

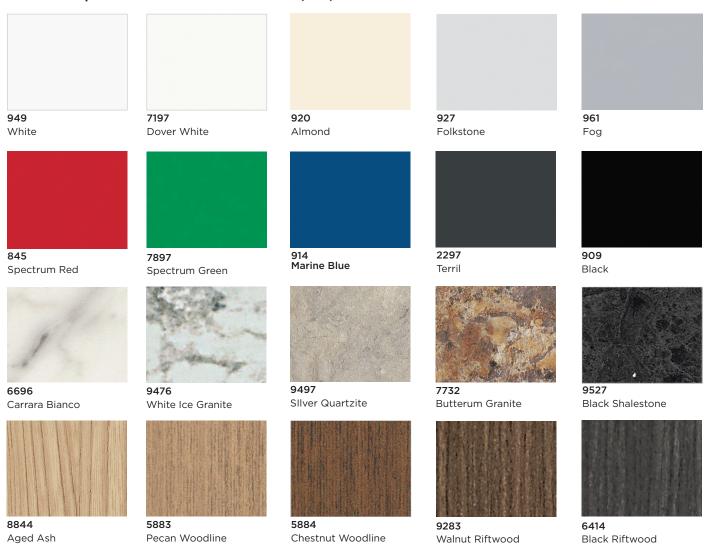

#### Product Features:

- Postforming
- Durable and Wear-resistant
- Horizontal and Vertical
- Impact Resistant

#### Formica® EliteForm

Our innovative Formica\* EliteForm surfacing technology redefines the performance attributes of high pressure laminate to deliver a more durable laminate for today's market. Formica\* Laminate with EliteForm features superior scratch resistance over other laminate brands, the ability to postform to a smaller radius with better blister resistance, and more durable, long-lasting surfaces, including the Gloss texture in horizontal applications. EliteForm comes standard on all Formica\* Laminates, at no additional cost.

#### Price Group One: All Colours are matte (-58) finish

#### Price Group Two: All Colours are matte finish

Formica Canada Inc. is located in St-jean-sur-Richelieu, Quebec, and employs more than 250 people.

Formica Canada is proud to be part of the Well Made Here local purchasing program.

As the inventor of high pressure laminate, Formica Corporation has always worked to provide innovative, high quality products. Efficient use of resources is at our core, and we have taken many steps to improve our environmental footprint - from reusing the water in our presses to incorporating recycled materials into our surfacing products. We are committed to a long-term planning horizon that includes becoming an industry-leading environmental steward.

# HOW TO ORDER

We'll help you select the right case for your requirements. The steps below will help us to serve you best.

- Choose the showcase that meets your display requirements from the product specification sheets.
- Review the options table found on the specification sheet and make your selections of the options provided.
- Select from the large pallet of colours found on the last five pages of the brochure, or choose a stainless steel, standard black or white for the exterior finish of your showcase.
- E-mail your request for a quote to your Cayuga sales representative or sales@cayugadisplays.com and we will quickly respond to your request.

  Please include your full contact information in case we have any questions.
